## VICE CHANCELLOR'S MESSAGE

The great challenges and difficulties, which we face today, teach us one lesson that, no one else but we, ourselves would determine our destiny.

It is my considered view that nations are built in the universities and research lab.

Our present situation compels us to bring a complete educational revolution in our country. Let us empower our people with the power of the pen. Verily, in this lies the secret of our success and the bright future of our forth-coming generations.
